## INTRODUCTION

Red Trident's Cyber-ECP™ product solves the complex challenges associated with rapidly enhancing cybersecurity for Operational Technology (OT). With nearly two decades of experience working in these environments, we know how engineers, technicians, and operators work. By rethinking OT Security and understanding the details of Process Control environments, we developed a solution that allows you to focus on operations while we manage your OT cybersecurity for a fraction of the cost of implementing it yourself.

## THE DIFFERENCE

The Cyber-ECP is a linear chain of security controls with each control reducing the attack surface an adversary would have to attack an environment.

# ICS

## automating your world

### **You face a unique set of challenges**

In all industries, technology is becoming more complex, market dynamics are constantly changing, and you face increasing pressure to do more with less.

It doesn't matter if you're in energy, oil and gas, plastics, or manufacturing, it can be hard to stay competitive.

For the past 10 years, we've helped hundreds of companies throughout many industries use automation to transform their businesses.

We are committed to helping transform our clients. Our process is simple —

- **Understand your needs:** Talk with one of our senior engineers and we'll identify the problems you're facing.
- **Get to work:** Working with your timing, budget, and existing equipment, our experts will work to a solution unique to your industry.
- **Transform your business:** No longer doing more of the same, reduce downtime, increase production, and deliver better results.

**We believe when technology is used correctly, it increases productivity and safety while reducing human error, training, and downtime.**

It's why ICS offers the automation expertise in implementation, systems integration, and maintenance you need to solve your most complex problems.

**Maxx Power, Inc.** was established late in 2014 and is growing to be known as the Fastest and highest Quality manufacturer. With over 17 years of experienced staff, our projects are built and installed in a variety of markets and industries. We use materials and components for world class equipment manufactures.

Customer service and satisfaction is our priority as we continue to seek building long term business relationships with our customers. We value the opportunity in serving our customers with the finest quality of engineering, workmanship, and professionalism.

Our promise is quality and satisfaction at a highly effective turn around time.
